Mission

All Saints Health Foundation exists to support Baylor All Saints Medical Center at Fort Worth in serving all people through exemplary health care and education.

- In the past five years, All Saints Health Foundation has funded more than \$14.4 million in research, capital improvements, equipment, staff education and other Medical Center needs.
- The Foundation continues to build partnerships with individuals, foundations, and corporations, all of which have an extraordinary devotion to Fort Worth and the care and concerns of its citizens.
- Every dollar raised in Fort Worth through grants and appeals, special projects, events, capital campaigns and planned giving programs stays here in our community to support medical programs, education, research, and community services.
- All Saints Health Foundation has ongoing fundraising programs supporting the critical needs of our community, and welcomes gifts of any size.

For more information on how you can make a difference, please contact:
All Saints Health Foundation, 1400 Eighth Avenue, Fort Worth, TX 76104

Thank you for your part in Our Journey

by Mike McMahon and Whit Smith

Mike McMahon
President

Whit Smith
Chairman

As we put together this second issue of *Our Journey* magazine, we look forward to the holiday season of gratitude and thanksgiving. At All Saints Health Foundation, we are especially thankful for you, our supporters. None of the work we do on behalf of our medical center’s patients would be possible without your generosity. Your philanthropic efforts make a difference for so many, every day. In times of great need, people find compassionate, quality care at Baylor All Saints Medical Center at Fort Worth – all thanks to you.

In the following pages you will read stories of hope, new beginnings, and new lives. You will learn about new advances in health care and ways Baylor All Saints is being recognized for the quality care we provide for our community.

Through it all, please know how grateful we are for the role you play in our journey. Thank you for your continued support.

Sincerely,

Mike McMahon
President

Whit Smith
Chairman

U.S. News & World Report examines hospitals for the “Best Regional Hospitals” report. We’re proud to announce that in 2014-15, Baylor All Saints Medical Center at Fort Worth has been recognized as one of the best hospitals nationwide in three specialties—Gastroenterology & GI Surgery, Nephrology, and Urology. And we realize, we have to re-examine this reputation every patient.

U.S. News & World Report Names Baylor All Saints Among the Best Baylor All Saints Medical Center at Fort Worth has been ranked as one of the best hospitals for 2014-2015 in three specialties: gastroenterology/GI surgery, nephrology and urology by *U.S. News & World Report*. The annual U.S. News Best Hospitals rankings, now in their 25th year, recognize hospitals that excel in patient care. Congratulations, Baylor All Saints!

I went from eating ice cream to asking for an ambulance

Bob* has a new outlook on life. At only 54 years old, he had a medical emergency that could have killed him.

Instead, new telemedicine technology in the Emergency Department of Baylor All Saints Medical Center at Fort Worth gave him a second chance.

Sixteen years ago, Bob was diagnosed with diabetes. “When you are told your feet are going to fall off, you decide to do things a little differently,” he says. Bob went from barely being able to walk to the end of his block to exercising daily, losing 72 pounds. “I learned how to make healthy food choices and I was able to stop taking my blood pressure medicine. I kept my blood sugar in check through diet and exercise for about nine years. Things were good.”

Then one day, a greasy cheeseburger called this healthy guy’s name. “After that burger, I started backsliding to the point I slid right off the hill,” says Bob. “The last three years of my life, I lived like I had no health problems at all. Ice cream is my biggest weakness. I began to feel like I needed it after every meal.”

A few years of poor choices started to take their toll. A passionate drag racer, Bob went to renew his license and couldn’t pass his physical. “The doctor told me my blood was like syrup,” he says. The results stung, but Bob was still confident he could figure out a way to work around the diet restrictions. One day after lunch with his wife, he hopped on his motorcycle to run up to the convenience store for some ice cream.

Always tinkering with his bikes or race cars, Bob remembers he was in his garage, sitting in a chair finishing his ice cream when his friend Adam* dropped by. Bob says, “We shot the bull for about 10 minutes, and then I asked him to call an ambulance.” Adam was stunned.

“The whole time I was talking to my buddy, I began to realize the only thing I could move was my head,” shares Bob. Adam sprang into action. He called Bob’s wife who was nearby and rushed home. Adam lifted Bob into a rolling chair, quickly wheeling him out to Bob’s truck, and buckled him into the passenger seat.

Bob was drifting in and out of consciousness, but thought to ask where they were taking him. When he learned of their original intention to take him to another local medical facility, Bob insisted they take him back home or get him to his first choice – the emergency room at Baylor All Saints Medical Center.

“I kept thinking to myself, it was 1:30 and I was just eating some ice cream,” remembers Bob. “In actuality, my wife tells me it was after 3:00 p.m. I must have sat there quite a while before Adam found me.”

Baylor All Saints medical staff surmised that Bob was experiencing symptoms of a stroke caused by his untreated diabetes. They rapidly introduced him to SARA – the Stroke Assessment Robotic Assistant. SARA is a 7-foot-tall robot that allows an emergency room patient to instantly connect with a neurologist, any time of day or night.

Bob could hear and process what was happening, but he began to lose his ability to speak. “I remember being wheeled down the hall to a robot with what looked like a television screen for a head. On the screen I could see a doctor who would move around to look at me remotely from his car, while the attendants moved my head, feet, and arms,” he says.

Dr. Dion Graybeal – who had pulled over on the side of the road to take the call – appeared on the robot’s screen and began assessing Bob remotely using his iPad mini. After a CT scan, the physician quickly analyzed the results.

Approximately 1.9 million neurons are lost every minute during a stroke, due to lack of blood flow to the brain. Dr. Graybeal explained that Bob had suffered an ischemic stroke and if he was not treated immediately, the paralysis he was experiencing would be permanent. Bob had the option to receive a medication called TPA, a drug that dissolves blood clots to restore normal blood flow to the brain. Dr. Graybeal explained the risks – it was possible Bob could die.

“My whole right side was in the fetal position and I was drooling. My memory was getting really foggy, but I heard the doctor tell my wife that there was one option – and we were at the tail end of a very narrow window for help.” Bob and his wife had just a few short minutes to make a decision. He knew right away he wanted the TPA, and after a few questions were answered, his wife agreed.

“I remember the doctor yelling ‘Go, Go, Go’ as the nurses secured the lifesaving medicine and administered it in the nick of time,” says Bob. Within 20 short minutes, Bob could move his hand, and within 45 minutes, he could wiggle his toes. Two hours later while he was in ICU, Bob could once again move his whole body.

After a brief hospital stay, Bob went home, and a week later, he and his wife went on vacation in Florida. Just a few months after his stroke, Bob is back at work running his business and has resumed almost all his normal activities, including riding his motorcycle. He’s even back drag racing, after finally passing his required physical.

Bob has returned to daily exercise and making healthy food choices. “It’s hard to explain how different you look at things when you’ve been unable to move. I take my diabetes very seriously now,” Bob says, with a smile on his face. “I believe things happen for us, not to us. And I now know just how important it is to actively manage my health so I never have to see that robot SARA again. As for Baylor All Saints emergency room – I’m proud to say I’m your biggest fan!”

**Names changed for privacy*

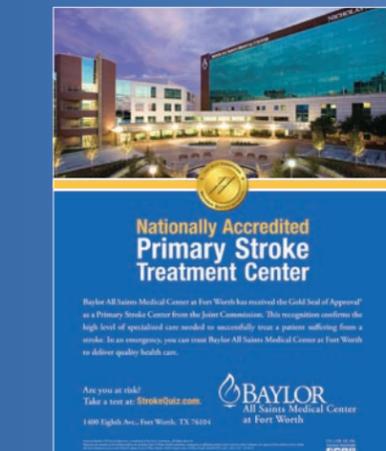

“They rapidly introduced him to SARA – the Stroke Assessment Robotic Assistant... that allows an emergency room patient to instantly connect with a neurologist, any time of day or night.”

Hospital News

New Stroke Center Certification

The Joint Commission – in conjunction with The American Heart Association/American Stroke Association – recently recognized Baylor All Saints Medical Center at Fort Worth with Advanced Certification for Primary Stroke Centers. Achievement of Primary Stroke Center Certification signifies an organization’s dedication to fostering better outcomes for patients.

Baylor All Saints underwent a rigorous on-site review in June 2014. “In achieving Joint Commission advanced certification, Baylor Fort Worth has demonstrated its commitment to the highest level of care for its stroke patients,” says Jean Range, M.S., R.N., C.P.H.Q., executive director, Disease-Specific Care Certification,

The Joint Commission. “Certification is a voluntary process. The Joint Commission commends Baylor Fort Worth for successfully undertaking this challenge to elevate its standard of care and instill confidence in the community it serves.”

Developed in collaboration with the American Stroke Association and launched in 2003, The Joint Commission’s Primary Stroke

Center Certification program is based on the Brain Attack Coalition’s “Recommendations for the Establishment of Primary Stroke Centers.” Certification is available only to stroke programs in Joint Commission-accredited acute care hospitals.

“Baylor All Saints is thoroughly committed to providing our patients the highest quality stroke care centered on current scientific research to ensure continued improvement in treatment,” said David Klein, MD, MBA, President, Baylor All Saints Medical Center at Fort Worth. “In addition to our Joint Commission accreditation, the Primary Stroke Center Certification has given us the opportunity to highlight the exceptional stroke care we provide for our patients, and help us improve care overall for our community.”

New life, new hope

Imagine being in the prime of your life and having no energy. What if a quick run to the grocery store left you exhausted for days? Imagine feeling as if you were doomed to a life lying on the couch—and you were a newlywed.

John felt lethargic most of his life. Faced with serious autoimmune disorders, the young man had developed primary sclerosing cholangitis – a disease of the bile ducts that causes inflammation and obstruction of the liver. John’s liver had been sending itself toxic poisons since junior high.

In love with his high school sweetheart for 13 years, John married Julie in 2010 – yet he never felt worse. “I was getting sicker and sicker,” says John. “I couldn’t eat...I lost a ton of weight...I had no energy...and my brain began to not be able to process information.”

“He ran through a red light and didn’t seem to understand what he had just done. Then, he ran another one, right after the first,” says Julie. “It scared me. I knew his disease was progressing rapidly. I had to do something.”

At only 32 years old, John was developing encephalopathy – a disease that affects the function of the brain. After seeing a Baylor physician who was able to rid him of this temporary brain infection, the couple began to understand how badly John’s diseased liver was affecting his entire body.

Level III Trauma Certification

The Texas Department of State Health Services recently designated Baylor All Saints Medical Center at Fort Worth as an Advanced (Level III) Trauma Facility in Trauma Service Area-E. The designation validates Baylor Fort Worth’s ability to treat patients who come to the Emergency Department with certain traumatic injuries.

This designation comes on the heels of other accolades achieved by the Baylor All Saints Emergency Department, including:

- Cycle 4 Chest Pain Accreditation
- Heart Failure Accreditation
- Advanced Primary Stroke Accreditation

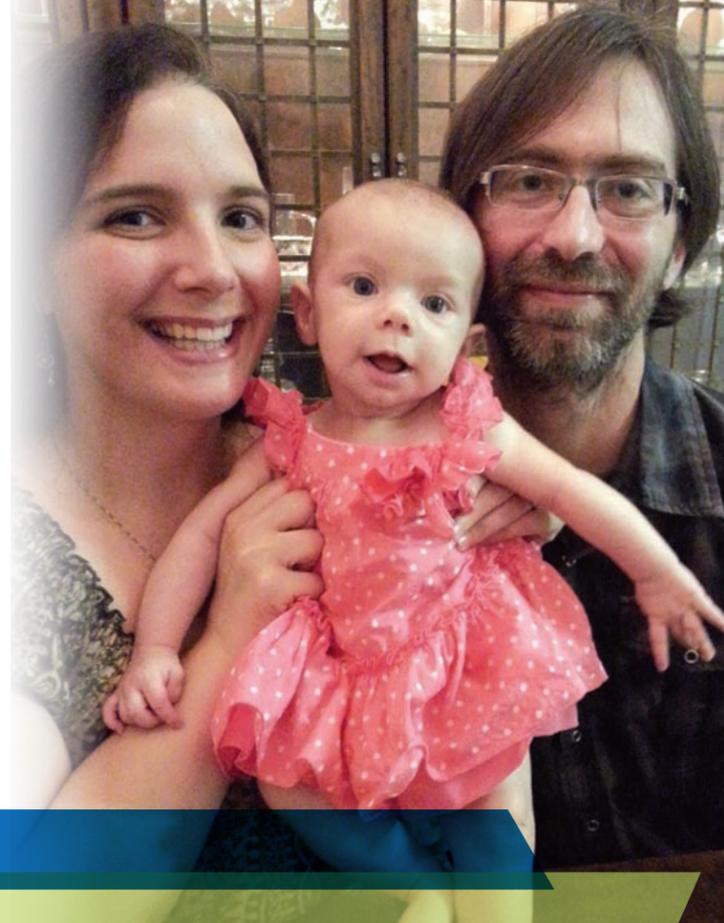

Record Generosity by Baylor All Saints Staff

We are proud to share that Baylor All Saints employees beat their annual fundraising goal! Our staff’s commitment to helping our medical center be the best place to give and receive quality, compassionate care shined through contributions via payroll deductions and annual gifts. Together, our staff raised \$199,630! We humbly thank our generous employees for their outpouring of support back to the Medical Center. The following special programs received designated gifts.

➤ Joan Katz Breast Center Endowment	\$27,166
➤ Employee Assistance Fund	\$23,056
➤ Fixel Endowment for Nursing Education	\$18,940
➤ Diabetes Islet Cell Research	\$11,135
➤ Emergency Department	\$10,833

See Page 13 for a special gift matching opportunity

**Milestone:
1,000th Kidney Transplant
at Baylor All Saints**

Baylor All Saints initiated its kidney transplant program in 2002. In the summer of 2014, the transplant team celebrated its 1,000th kidney transplant.

“This transplant milestone truly speaks to the professionalism and expert care the Baylor transplant team delivers to the Fort Worth community,” says Marlon Levy, MD, surgical director of the Simmons Transplant Institute at Fort Worth and on the medical staff at Baylor All Saints.

Baylor All Saints’ kidney transplant program grew by 33 percent in the past fiscal year. The increase includes kidney transplants performed with organs from deceased donors, as well as transplants with living donors. Approximately 25 percent of kidney transplants come from live donors. More than 90,000 people nationwide are on transplant lists, waiting for a kidney from a deceased donor.

Transplant surgeons Nicholas Onaca, MD, (pictured left) and Tiffany Anthony, MD, (right), performed Fort Worth’s 1,000th kidney transplant on brothers Lee and Aaron Goggin (center left and right).

Foundation donors honored with Philanthropy Award

Giving back to the community is important to Mary and Dick Lowe. As a breast cancer survivor, Mary has shown a deep and abiding appreciation for the support and hope she found at the Joan Katz Breast Center at Baylor All Saints Medical Center. Her experience there made her and Dick enthusiastic supporters of All Saints Health Foundation and Baylor All Saints. The Lowes have tirelessly supported the Joan Katz Breast Center (JKBC) with generous donations of their resources as well as their time.

Mary currently serves on the All Saints Health Foundation board as well as the JKBC endowment campaign committee. The couple also recently served as honorary chairs of the 2013 Beyond the Bag annual fundraising event for the Joan Katz Breast Center. With the Lowes’ valuable leadership, more than \$350,000 was raised for the JKBC through this annual benefit – our best year to date!

All Saints Health Foundation nominated the Lowes for an award at the annual local Association of Fundraising Professionals (AFP) National Philanthropy Day. Mary and Dick were honored on October 30 as **National Philanthropy Day Distinguished Philanthropists by the AFP Fort Worth Metro Chapter**. This prestigious award recognizes their generosity as supporters of All Saints Health Foundation, Baylor All Saints Medical Center, the Joan Katz Breast Center, and several other nonprofits making a difference in our community. We at Baylor All Saints are forever grateful for the generosity and leadership of Mary and Dick Lowe.

Today, John is thankful for his wife’s determination – and for his future.

Continued from page 5

In early 2011, John was evaluated for a liver transplant at Baylor All Saints. One hot July afternoon, John was taking a nap when the phone rang. “It was Baylor, telling us we were an alternate, and we needed to get to Fort Worth right away,” says Julie.

Alternates are often required protocol for organ transplants, as it’s critical for a viable candidate to be in place rapidly. “An alternate? I was so depressed and lethargic that I rolled over and went back to sleep,” says John. “I didn’t see what good being an alternate was going to do me. I was giving up.”

Julie was at a loss. Thankfully, a few minutes later, the phone rang again. “They said that the original candidate declined the organ, and we needed to get to the hospital now! I panicked!” remembers Julie. “The Baylor All Saints representative was so kind. She told me I could do this. John was sick and he needed my help to get a new liver. I forced John to get up, threw his bag in the car, and sped to Fort Worth.”

Today, John is thankful for his wife’s determination – and for his future. The couple welcomed their little girl – Freya – in May 2014, and hope to grow their family even more one day. John has his strength back and at age 35, feels better than he did in high school. “To say my life has changed is an understatement. I used to just sit...all day, every day. Now my biggest problem is finding someone to go fishing with me! I was raised understanding that I had to take care of things myself – to handle my own business. Now, I owe a stranger my life. That’s no exaggeration. It’s my life – what’s more important than your life?”

BEYOND *the* BAG

party with a purpose
JOAN KATZ BREAST CENTER

Saturday, January 31, 2015
7:00 to 11:00 p.m.
The Fort Worth Club
Don't miss the best party of the year!
Mark your calendars now. Buy your tickets today!
BeyondTheBagFW.com

Join us Saturday, January 31 for Fort Worth's Party with a Purpose! Beyond the Bag, a fundraiser benefiting the Joan Katz Breast Center Endowment, promises to be an evening of fabulous food, dancing, and action packed silent and live auctions. Designer handbags, including items for men and women, will be featured. A live auction featuring exclusive items will be the highlight of the evening. Rounding out the night is the raffle drawing for a 2015 Lexus graciously donated by Dallas Fort Worth Lexus Dealers.

A limited number of raffle tickets are available for purchase. When you buy a chance to win a Lexus, you are giving a chance to someone who has heard the words, "You have cancer." Call 817-922-7706 or visit BeyondTheBagFW.com to purchase your chance to win.

For additional opportunities to support Beyond the Bag, through sponsorships or advance ticket sales, please call 817-922-7706, visit BeyondTheBagFW.com, or email BTB@baylorhealth.edu.

Pictured below left to right from 2014's event:

(1) Allison Beadles, Shannon Haddaway, Leesa Kaufman; (2) Terri Anderson, Paul Dorman; (3) Mark Vaughan, Guynell Whetstone; (4) Kathy and Jerrell Farr

REMEMBER—Lexus Raffle tickets make great holiday gifts!

Get your tickets now for the Lexus Raffle benefiting the Joan Katz Breast Center. A winner will be drawn at Beyond the Bag on January 31. New this year, the winner will choose either a 2015 Model Year Lexus RC 350 or a 2015 Model Year Lexus NX 200, each valued at approximately \$42,000. Thank you to the Dallas-Fort Worth Lexus Dealers for generously donating the raffle vehicle. Call 817-922-7706 or visit BeyondTheBagFW.com to purchase your chance to win.

Women's Health Council

CARING *for* WOMEN *for* LIFE

The Women's Health Council is a unique group of approximately 75 women dedicated to improving the health of local women and their families. These diverse women are chosen for their strong commitment to the Fort Worth community and their interest in women's health and its impact upon the family. The mission of the Women's Health Council is to use its collective leadership and commitment to be a voice for Andrews Women's Hospital and Baylor All Saints Medical Center at Fort Worth.

Through Women's Health Council programming, members are empowered to become knowledgeable and proactive about health throughout every stage of life. In addition, members gain an awareness of the Medical Center and its various programs. The community and business leaders that constitute the Women's Health Council assist in introducing women to the services and programs offered by the hospital – connecting women and their families to comprehensive health care they can depend on throughout their lives.

To learn more about Women's Health Council, please visit givetoallsaints.baylorhealth.com or call 817-922-7706.

Volunteers

*No reward needed—
Service with a smile*

Eve Billingsley has been a volunteer at Baylor All Saints Medical Center at Fort Worth for 32 years. In 1982, Eve's friend Mary Kay encouraged her to help at what was then All Saints Hospital. Mary Kay served on the Auxiliary board and thought Eve would make a good volunteer – and she was right. Eve has given more than 7,000 hours of her time through the Baylor All Saints volunteer program.

At first, Eve's favorite task was helping with the frequent sales of baked goods and other small items to raise money for the hospital. All funds raised went to the Auxiliary, which in turn, supported hospital programs.

Later, Eve had the opportunity to work in the Guest House – a special area of the hospital acting as a home away from home for patients' family members who could not afford to pay for a hotel. Eve found the work interesting and enjoyed building relationships with the guests while serving them meals and making their beds. Eventually, the Guest House was transformed into a patient floor as the medical center grew.

Over the years, Eve has helped in the gift shop, sold popcorn, and served as president of the Auxiliary. Today Eve works at the flower desk once a week,

delivering flowers all over the hospital. Patients are greeted with a sweet smile to go along with the beautiful blooms from their friends and loved ones. Although the volunteer uniforms are no longer pink and there are not as many volunteers as in the past, many things have not changed. Eve still works a four-hour shift each week, and patients and their visitors still appreciate a friendly smile.

When asked what reward she receives from volunteering, Eve pauses to think. "It gives me something to do," she says modestly. Visiting the patients also makes Eve appreciate her own good health. When people ask how she is, Eve's consistent response is "Perfect!"

When not at the hospital, Eve enjoys Garden Club and takes care of her family's business affairs. In February, she will celebrate 60 years of marriage to her husband Sam, whom she calls "the sweetest man in the world." Commitment seems to come naturally to Eve Billingsley, and for that, all of us at Baylor All Saints are grateful.

To learn more about volunteer opportunities at Baylor All Saints, please call Pattie Bennett, manager of Volunteer Services, at 817-922-2376.

Foundation Welcomes New Board Member

All Saints Health Foundation is happy to welcome Jeanie Luskey to the board of directors. Jeanie has actively volunteered for several organizations over the years and is passionate about health care – particularly cancer diagnosis and treatment. Her love of children has led to her leadership with Jewel Charity, where she has served for 26 years, including a year as president. Professionally, Jeanie was a regional sales representative for Caspari Papers from 1992 to 2012. She recently served on the Joan Katz Breast Center Homestretch Committee, raising money for the endowment, and also served on the Beyond the Bag committee. Please join us in welcoming Jeanie to our board!

MARIA D. BEGGS

Planned Giving Society

In the late 1800s, when Fort Worth was still considered a frontier town, Maria Deborah Dickey Beggs and 14 women from her Sunday school class saw a need for health care in their community. These women went door to door to raise money for what is known today as Baylor All Saints Medical Center at Fort Worth.

Named to honor the woman responsible for establishing Baylor All Saints, The Maria D. Beggs Society was created in 1999 to honor those who have included All Saints Health Foundation in their estate plans. The mission of All Saints Health Foundation is to support Baylor All Saints Medical Center at Fort Worth and the services it provides. Through their giving, the members of the Maria D. Beggs Society have made a commitment that will benefit Baylor All Saints Medical Center and the community they serve for generations to come.

Qualifying gifts include:

- Will Bequest
- Charitable Gift Annuity
- Charitable Remainder Trust
- Life Insurance
- Charitable Lead Trust
- Remainder Life Estate
- Retirement Accounts

There are no membership fees or minimum gift amounts required to be included in the Maria D. Beggs Society. The size of your gift is kept confidential and the gift can be recognized publicly or remain anonymous.

For information about becoming a member of the Maria D. Beggs Society, please contact:

Happy 1st Birthday

Just over a year ago, Baylor Health Care System and Scott & White Healthcare became one. Today, we're looking toward the future of health care for everyone – a future we're building together.

In the past year, Baylor Scott & White Health has:

- Increased access to quality care with more than 800 access points for 5.3 million patient encounters annually.
- Expanded our commitment to community needs through \$861 million in community benefit spending*.
- Created the Baylor Scott & White Quality Alliance, a 3,700-physician-strong network that is one of the largest accountable care organizations in the country.

Separately, we shared a vision for a vibrant future. One year later, we share the resources to bring it to life.

The largest not-for-profit health care system in Texas, and one of the largest in the United States, Baylor Scott & White Health was born from the 2013 combination of Baylor Health Care System and Scott & White Healthcare.

After years of thoughtful deliberation, the leaders of Baylor Health Care System and Scott & White Healthcare decided to combine the strengths of the two health systems and create a new model system able to meet the demands of health care reform, the changing needs of patients, and extraordinary recent advances in clinical care.

With a commitment to, and a track record of, innovation, collaboration, integrity, and compassion for the patient, Baylor Scott & White Health stands to be one of the nation's exemplary health care organizations.

* Calculated for Baylor Scott & White not-for-profit hospitals in accordance with Texas Health and Safety Code, Chapter 311
